	Awk	Batch	Shell	Bash	Ksh	Jscript	Perl	PHP	PowerShell	Python	Ruby	TCL	VBScript
Output													
stdout													
Variables													
string concenation													
string interpolation													
Arithmetic													
interger math													
boolean math													
floating point math													
math function: cos													
Input													
stdin													
short prompt													
Branch													
select integer													
mulit-select char													
select char: if													
Looping													
interative loop													
conditional loop													
collection loop													
Array													
initialize by index													
initialize by list													
array size													
array enumeration													
Associative Arrays													
initialize by index													
initialize by list													
enumerate keys													
enumerate values													
concatenate array													
Subroutine													
subroutine													
Arguments													
number of args													
calling script													
enumerate args													
Parameters													
single parameter													
unlimited parameters Function													
return number													
return string													
return array													
return array
